

# SOLID FIBERGLASS GRIPPER BARS

**FORMETCO®**

## MADE TO PROTECT & DESIGNED TO LAST

Our Gripper Bars are the ideal product for flex-face vinyl installations when used in conjunction with our Heavy Duty Ratchet Assemblies. Using Formetco Gripper Bars is a safety net for your employees against accidental electrical shocks while working in the field. Our exclusive UV Protectant Veil adds additional protection to our Gripper Bars which helps keep them from chipping or splintering and adds additional life to the product. Formetco's choices of Gripper Bars include 5/8" diameter for Poster Panel inserts and 3/4" diameter for Bulletin wraps.

- Easily slides into the pockets of flexible vinyls
- Largest stock in the industry of standard lengths; 10ft, 12ft, 14ft and 24ft
- Custom lengths are available
- Gray in color so not to detract from the ad copy
- Light weight
- Long lifespan, lower life-cycle cost
- Electrically non-conductive
- Corrosion resistant high strength solid core fiberglass construction
- Dimensional stability, will not warp and less likely to break when used with Formetco's Ratchet Assemblies

**Note:**

Always be aware of hazards around you when working on billboards, such as nearby power lines.
