

# LADDER PROSHIELD

**Thanks to the many requests and input from our customers, Formetco is happy to announce that we have added another great complimentary product to our suite of billboard solutions, called the Ladder ProShield.**

Made out of durable pre-painted steel with several color options available, our guards are designed to blend in with your structure, being less of an eyesore that doesn't distract from your clients adcopy. The lockable 8' tall metal guard cover allows for authorized fixed ladder access only, while discouraging unauthorized vandals from climbing up your structures. To gain access, climbers would unlock and remove the padlock and swing open the Ladder ProShield. To prevent the door from accidentally closing while the ladder is in use, our design is the only product to incorporate spring hinges with a tethered security pin to lock it in place. Protect your valuable billboard assets from vandals by calling your Formetco Hardware Sales Representative today!

## Features and Benefits

- Discourages unauthorized climbing of fixed access ladders while reducing owner liability
- Angled sides deters reaching around the Ladder ProShield to access ladder rungs
- Eight foot height helps prevent bypassing the cover
